

The EU Data Act

Pre-contractual information under the EU Data Act

Last updated: Dec 4th, 2025

In compliance with the European Data Act (EU Regulation 2023/2854), Brovi as a manufacturer provide clear and accessible information, includes details on the types of data generated by our connected products, the formats in which data is stored, and the methods available for users to access or delete this data.

1. we have provided some estimated approximate volume per user per day below to give users a sense of how much data their products generate.

1.2 Type of Data

System logs.

1.3 Data format and Estimated approximate volume per user

Format as .log and 9 kb.

1.4 Collection Frequency

Depends on user usage.

1.5 Retention period

Cycle coverage, maximum 100 lines per data.

2. How you can manage the data

Legislation in certain countries and regions where we provide products and services stipulates that data subjects have rights to access, correct, retrieve and delete data. The user or their authorized third-party may access, retrieve or delete themselves.

For the device-side data, the user may access some data directly. The user may log in to the WEBUI and access the content through the Advanced > System > System Settings > System Logs. Data may be exported by selecting the 'Export'.

3. Data using by Brovi

Brovi and its affiliates companies may use products and related service data for analytics purposes, based on user consent. If personal data is involved, data will be processed complying with applicable GDPR rules. For more processing details, please refer to the respective Privacy Statement.

4. Updates to This Information

Brovi reserves the right to update this Information at any time. This Information will be revised from time to time. If major changes are made to this Information, we may notify you by posting an updated information on our website. The most current version of this Information will always be available here.
